PROFESSIONAL SUMMARY

Full Stack Developer and B.Tech Computer Science graduate with hands-on experience building responsive, full-stack web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js) and Python. Skilled in designing accessible, responsive UI/UX with React.js and Tailwind CSS, integrating REST APIs with SQL and NoSQL databases, and debugging/optimizing front-end and back-end performance. Comfortable picking up new frameworks quickly, with growing exposure to LLM-powered features via the Anthropic Claude API, and eager to contribute to live, real-world projects in an agile team.

WORK EXPERIENCE

Associate Software Engineer | Global AI Technologies Internship

Jan 2026 – Jun 2026

Remote

- Developed a responsive web application (Python + HTML/CSS) that allows users to upload datasets and auto-generates interactive analytical dashboards with visual summaries, integrating a Python backend with a clean front-end UI.
- Collaborated with designers and teammates in an agile team environment, writing clean, well-documented code and delivering projects on time with clear communication.
- Debugged and optimized application performance, researching new tools and libraries to improve workflow efficiency.

Full Stack Development Intern | Xebia Internship

Jun 2025 – Jul 2025

Online

- Built a full-stack mental wellness platform using the MERN Stack, featuring teletherapy booking, mood tracking, and user/therapist dashboards.
- Led responsive UI/UX design with React.js and Tailwind CSS, ensuring cross-browser compatibility and accessibility.
- Designed and integrated RESTful backend APIs with Node.js, Express.js, and MongoDB for full-stack functionality.
- Managed end-to-end deployment and contributed to scalable system architecture design.

PROJECTS

MindMend – Mental Wellness Platform | MERN Stack

July 2025

- Built a full-stack platform connecting users and therapists, featuring mood tracking, teletherapy booking, and role-based dashboards for patients and therapists.
- Designed separate user and therapist dashboards with distinct views for appointment history, mood trends, and session notes, plus a booking module with therapist availability and slot selection.
- Implemented a mood-tracking feature allowing users to log daily entries, visualized over time to help users and therapists spot patterns.
- Designed and integrated RESTful APIs with Node.js, Express.js, and MongoDB to handle authentication, appointments, and mood-entry data with a well-structured schema.
- Built an accessible, responsive React.js UI with Tailwind CSS and deployed the app end-to-end so it stayed live and testable throughout development.

Sales Analytics Dashboard & Web App | Python · React.Js

April 2026

- Built a responsive web app where users upload sales data files (CSV) and receive auto-generated, interactive dashboards for instant analysis.
- Designed a Flask backend to parse and process uploaded datasets, computing summary metrics and preparing data for visualization, including handling missing or malformed rows.
- Implemented dynamic chart generation (trend lines, bar and pie charts) so users could visually explore sales performance without manual setup.
- Built a clean, intuitive front-end UI for uploading files and browsing generated dashboards, focused on a seamless, cross-browser experience.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS

Databases: PostgreSQL, MongoDB

AI / LLM: LLMs, Prompt Engineering, Anthropic Claude API

Tools & Platforms: Git, GitHub, VS Code, Netlify, Postman, Vercel

Soft Skills: Communication, Team Collaboration, Quick Learner, Time Management, Adaptability

EDUCATION

B.Tech – Computer Science Engineering

2022 – 2026

JECRC University, Jaipur | CGPA: 8.2

Higher Secondary (12th)

2021

Sant Atulanand Convent School, Varanasi | 85%

Secondary (10th)

2019

The Ab's Rowland School, Varanasi | 81%
